

**To Do:** Change "Hello World!" to some other message, such as "Hello World! CS 234" by editing the **System.out.println()** statement. Then re-run the program. Eclipse will automatically save your changes.

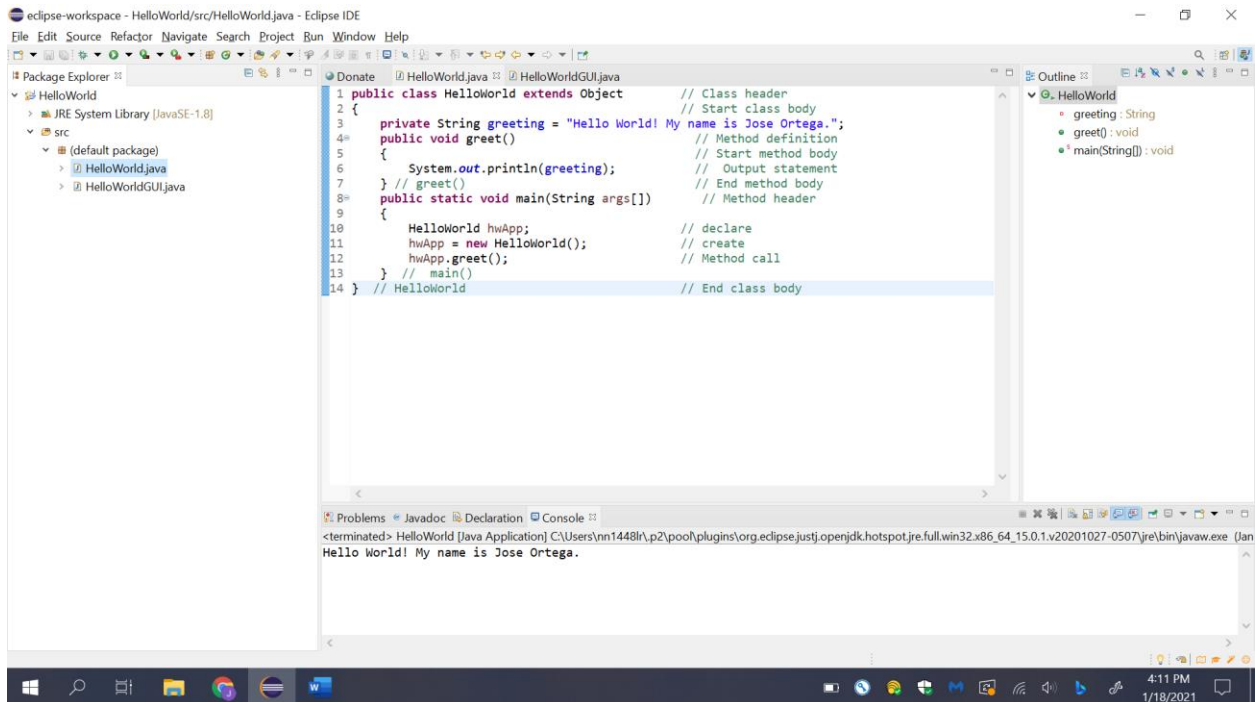

**To Do:** Change the name of the class in HelloWorld.java to Lab1 and then save the file.

**To Do:** Delete the semicolon after the `System.out.println()` statement.

**To Do:** Modify the `HelloWorld` class with the following code. Rerun and observe the output.

**To Do:** Run the code and interact with the pop-up GUI.:
